Seabee Club Newsletter

Jim's not flying, but both of his Seabees are!

Hello Everyone,

Looks like we may have pretty good gathering of Bees at Clear Lake this year. I sure would like to hear from those of you in the NW that may consider making the trip later this month. We'd love to have some company along the way. There will be a special presentation for Big Jim Sorensen who flew west this year. He'll be getting both of the 50 year awards from the FAA. Yes, the picture above is one of Jim Sorensen's former bees. His other Superbee should be flying as you read this according to a recent report from Henry Ruzakowski. We're expecting Alan Watson, and Don Kyte too. If you're at all interested in Seabee history, getting to know these guys and hear their stories is a true gift.

There seems to have been an emergence in interest in the old water wagons recently. I've had lots of call and questions. In fact we had some new owners bring a Bee to the Seattle area this past month. They'd just flown it about 20 hours and were just starting to have some real fun when the Frankenstein started shedding parts through the exhaust. Fortunately, they were over water and did a good job of getting to a good spot with no more damage than what the old Frank produced. It will be interesting to hear what failed when they actually get the engine apart and see what's inside(or not).

There should be a bunch of Bees in Hammondsport in a few weeks too. I have not had a report on Jim Poel recently, but last I knew he was making good progress and has plans to BEE there. We really hope so. Speaking of being there.... Long time members Donn and Judy Booth plan to be there and Donn is parting with his life long collection of magazines, some of them dating back to the 1930's. This includes Flying, Sportsman's Pilot, AOPA, Aviation Week, Sport Flying, Sport Aircraft, Air Tech, and Flight. Donn also has some National Geographic back to 1915, Popular Science, Popular Electronic and Mechanics (back to the 1930's); Cycle, Gun, Classic Cars and a few Hot Rod. He has Model Airplane, Model Cars, and other modelmagazines too.

If anyone desires to get in touch with them, they can be reached at 607-756-8238. They live in Cortland, NY, which is located between Syracuse and Binghamton and they plan to be in Hammondsport. But, the best way to contact them is via email donn_b@verizon.net (that's an underscore between donn and_b).

Maintenance

Last month I'd asked for any known issues regarding the Weldon 8120G fuel boost pumps used in the Simuflight GO-480 conversions. One of our members has been having a recurring problem and I'd been getting a green slime where the pump vents. Although it didn't happen when I flew or ran the pump, it would show up days later.

I did change out the pump and the goo-slime is gone. The other problem of pumping air which was suspected because the engine would die shortly after starting like it can do during a warm start on a fuel injected engine, that has been eliminated.

As I think back on this, I had first noticed a tan or brownish stain on the white paint that was streaked like something had been leaking in flight. It was fairly faint and hard to see. Nothing appeared to be leaking so I let it go and didn't think much of it. After about 50 hours or so and about a year later I started to notice this slight stain was turning green. The tan stain was hard to get off, but the green was soft and pasty. It wasn't until I started seeing the green that we noticed the after starting problems.

So, if your pump is putting a stain on the paint or it wants to die just after starting, even though pressure is normal and the pump is not making any unusual noise. It may be time to change your boost pump.

Safety

Do you follow any of the news groups on the web? I subscribe to alerts from Google. If there is any story that comes up with Seaplane, Floatplane or Republic Seabee in the text, I get an email with a link to the news item. I bring this up because there have been no less than 3 major and unnecessary seaplane accidents this past month. Experienced pilots too. Please be careful out there. We probably haven't flown as much as we would have liked this season, and I know you're probably anxious to go when the weather permits. Please take your time and use a check list.

Here's a discussion on Jason Baker's seaplane forum regarding one of the accidents. www.seaplaneforum.com/viewtopic.php?f=17&t=206 Jason's other website is chock full of other safety related items. He writes.....I relaunched www.aviationsafetytalk.com with a so called SMF software. Klaus Marx just signed up for testing and brainstorming.

History From David Johnston.....

Hello Catalina Island Seaplane Fans! Just in case you are interested - listed below is a link to the newly released DVD about Catalina Island aviation history part II. Part I is also very interesting... <http://www.channelcatalina.com/home/> Happy landings!--DJ

Classifieds Listings will be for 6 months unless I hear from you. After that, they may be gone... renew or update your ad as long as you like! Cleaning out your hanger, sell it here! Need some parts, let us know!

Ken Kunz Needs....

2 blade Hartzell jack plate with phenolic blocks. That's part of the hydraulic unit that actuates the pitch change on the seabee 2 blade Prop, Franklin Engine (hydro Selective Unit) If you have or know of one, here's a link to his email. [Kenneth Kunz 7/10](mailto:Kenneth.Kunz@710.com)

(2) LOW TIME GSO-480 ENGINES ! • AVAILABLE FOR SALE • 265.4 / 48.4 S.M.O.H. by Columbia Aircraft Services, pickled condition, still in nacelles & stored. Also have other GO-480 Engines and Parts. Contact Gregg Cadieux, located Scotia NY Telephone: 518 424-8235 twinbo550@aol.com this is a great deal folks! 6/10

HARTZELL 3 BLADE PROP • \$2,500 • ACCEPTING OFFERS • 3 Blade prop for GSO-480 Lycoming, Spline shaft chrome spinner, no damage complete Model HCA3V20-1B • Contact Neal York, Owner - located Mead, CO USA • Telephone: 970-290-3828 6/10

Lower Wing Strut Fittings

Tough times generally involve great sales prices and I have a great sale price that I'm hoping someone is interested in. I ran a batch of 5 sets of RC-3 fuselage mounted, lower wing strut fittings and they ended up costing me a bit over \$1k for each piece to make. I need to try and get some financial recovery out of the two RH's and one LH that I still have. I'm willing to take \$300.00 per piece and will consider offers if you are interested. This is only 25% of what it cost to produce them. Know these parts were produced under the original RC-3 drawings. Metallurgical testing was performed from an aerospace metals lab on an original piece and they determined what modern alloy would be equal/better to use as a replacement since the original alloy is no longer produced. I can provide all of the certifications paper work.

Disclaimer: Although the parts were produced professionally, they are allowed for use on Experimental aircraft only as they weren't

produced under an FAA approved process for Type Certificated aircraft.

If anyone wants it, I could also sell the C&C program that I paid for, should you ever want to make more.

Contact, `<?xml:namespace prefix = st1 />`Bob Mortenson The Pitstop, Inc. PH: 406-777-3163, 406-370-5860 Cell 4/10

TRADE for a Seabee! N3N Floatplane For Sale

This USN file photo shows an N3N (not mine) on floats. My N3N, N45129, is currently hangared in Colorado. It's in the landplane configuration, although I have a 100% complete set-up to re-configure the airplane for water operations.

My N3N was built in 1940 (S/N 1962). It remained in US Navy service until 1946, when it was surplused and became a crop duster. In 1969 it was placed in hangar storage in Texas, where it remained until 1980 when it was ferried to Arkansas for restoration. It underwent a ground-up restoration from 1980 until 1989 when it was certificated in Standard category. From 1989 until 2001, it had flown 401 hours when the owner died, then went into a hangar until July 2004 when it was purchased by me. I flew it to Texas and installed Redline disc brakes, using FAA Form 337 on a field approval.

In February 2005, I took a job in Singapore, flying the N3N to a museum in Arizona where it remained on display until April 2008. In April 2008, I flew it to Colorado and put it in a hangar there, where it remains today.

It has a 300-hp Lycoming 9-cylinder radial engine with Hamilton Standard 2B20 constant speed prop. Both engine and prop have 437 hours of operation. There is no wood in this airplane, as the US Navy manufactured them using aluminum extrusions left over from the dirigible program. The fabric is now 20 years old and shows its age, but is good for many years. It would benefit from a new paint job.

Regarding spare parts, I have a core 300-hp Lycoming engine with mount, pristine upper wing, right and left lower wings, two elevators, rudder, vertical and horizontal stabilizers, "N" struts, eight ailerons and a multitude of spare parts too numerous to mention. My float set is 100% complete, including 20-foot centerline float, 6-foot wingtip floats, all struts, braces and attach fittings, and newly manufactured stainless steel flying wires.

I'm still working in Singapore and have decided to take up permanent residence in Asia, which is why I've put the airplane on the market. I have approximately \$105,000 USD invested in the airplane, spares and floats, but will consider any reasonable offer. Upon purchase, it will be given a fresh annual. I would also be able to provide delivery and a check out, with CFI endorsement. General historical and factual N3N information can be obtained via Google.

Should you have further interest, I'll send copies of logpages, 337s and other relevant maintenance documents.

Please reply to my Yahoo e-mail address: usnavy_n3n@yahoo.com

Best regards. Richard Ries 2/10

SuperBee! GO 480 Simuflight Conversion NEW fuel injected ENGINE and PROP!

Recent engine overhaul. New 3 bladed Hartzel propeller with Beta Ring pitch control, fully reversible. Droop tip extended wings. Collins microline VHF, transponder, ADF. VIR and Morrow Apollo Loran C. Digital fuel management system Miniflo – L. Steerable tail wheel. To inspect airplane, call (253)752-4987 to arrange an appointment. Ben Blackett

LS-6 powered 350 HP Corvette "BEE" for sale, NOW U.S. registered!

Don't miss this rare "BEE", it is a great aircraft. No oil required between oil/filter chgs. BURNS LESS THAN 10 USG PER HOUR ON PREMIUM AUTO FUEL.

- MGTW 3350 lbs., Usable load 1200 lbs., rate of climb, over 600 F.P.M. at Max Gross @ SL.
- Hartzell wide cord composite fully reverse-able prop w/spare COMPOSITE & Metal blades.
- Wide spray rails w/propellor" No-Spray shield " at hull step, works great.
- Spectacular T/O performance, even off calm water, at full gross weight, 19 sec's
- All new windows, all new stainless control cables, bow door w/auto hold open feature.
- Aircraft totally re-wired, standby alternator, split-able dual battery system.
- Cabin heater & defog system, free fall undercarriage with positive downlock feature.
- Black stainless disc brakes, good tires and positive tail wheel lock, new 75 gal. fuel bladder.
- Capacitance type fuel tank gauge system, Removable 15 gal long range aux fuel tank.
- New paint & new upholstery & carpet 1 year ago. Short wings, splate tips, flasher beacon.
- All new Inst. panel with COM, transponder, stdby nav/com, Garmin GPS, vertical compass,
- Vac. gyro horizon, some spares, and many more extras too numerous to mention. Meets all specs for import into U.S.A.

Roger Duke's Super Seabee, Home and Hangar are 4 sale.....

Serial #56, Simuflight GO480-B1A6, 270 HP, logs since new in 9/16/46. Hangared, TTAF 2188, Engine only 600 since overhaul. Reversible Prop 322 since overhaul, 5 yr. AD last year (same as overhaul), Landing light each wing tip. Overhead engine controls, Large spray rails, Locking tail wheel, Cleveland

brakes, Whelen strobe system, Daubenspeck droop wing tips, KT 76A transponder, KR 86 ADF, KY97A Comm., Narco 122 Nav., Northstar M2V Loran/GPS, \$95,000. Contact Roger Duke 360-321-1537. email rduke@whidbey.com 02/09

[Airpark Home on Whidbey Island, WA](#)

Roger is also selling his home. If the following link doesn't work, go to Windermere's website and type in the following MLS # 27025608. WOW <http://www.windermere.com/index.cfm?fuseaction=Listing.ListingDetail&ListingID=17411843>

G 21A Grumman Goose

Serial Number B 32 is one of the best fresh-water Gooses in existence. It is a straight, corrosion free, always-hangared and well maintained aircraft perfect for long-range exploration. It has only 4,000 hours since it was rebuilt in 1982 for the late Bob Richardson of Seattle.

Total airframe time: 8,638 hours.

Clean, smooth-running P&W R985s with 890 hours and good compression.

Heavy Hartzell props and Twin Beech cowls.

Retractable water rudder and McKinnon retractable floats

Electric up and crank down landing gear.

Mallard Goodyear wheels and brakes (Great!)

Electric fuel pump and long-range fuel tanks

Bubble windows in cockpit, picture windows in cabin.

One-piece front bow hatch.

Full King IFR package including HSI, RMI, and Radio Altimeter

New interior with six quick-release original Goose seats on tracks.

Original paint since 1982 rebuild. Still has good gloss.

Complete logs, beginning with original 1943 delivery logs.

For more details and pictures, please see <http://www.tanglefoot.org/gooseforsale.html>

Price: \$650,000 with new annual.

Editor's note: This owner KNOWS Grummans. If he says it's one of the finest, you can count on it. 1/09

Seabee Products And Information

Bubble Windows Aircraft Windshields in Los Angeles is run by a lady named Judy. They do a great job according to Steve Lantz. The bubble molds are there and all she needs is your old windows as pattern for size. Call 562-430 8108

Wing Walks, those things you put on the wings when you want to get up and clean up the oil mess... Jim Dixon's dad is a retired carpenter and will make these for \$100 each. He does a great job from the original plans, they just aren't quite as wide. Which is nice, they are a lot easier to handle. I have two one for each side. He also puts felt on the bottom edges so they don't scratch the wing and carpet on top. Contact Jim page@earthlink.net 253-973-9985 or at home 253-232-9463.

Walk Around Inspection <http://www.aircraftwalkaround.com/seabee/seabee.htm> is an interesting series of pictures of a walk around. Note the high polish job and a very interesting water rudder.

Leading Edge Wing Tanks (I want some of these...)

Second generation Seabee Guru, Henry Ruzakowski, has developed tanks that will hold at least 15 useable gallons per side. They are made of carbon fiber and Kevlar and will gravity feed to the main tank with the operation of one lever. They will be done on a field approval, so you'll have to take your airplane to him in Florida. **So, let's plan a trip to Sun and Fun!!!** Call or email Henry for more information. 561-436-0821
amphibs1@aol.com

The Seabee CD and the new Newsletter CD! The Seabee CD contains all the Bulletins, Flight Manual, Parts Manuals, etc.. He states ..."Everyone I have sold this CD to has found it most useful. I have re-typed all of the Service Bulletins and reformatted the parts manuals for easier reading. The **Newsletter** CD contains most of the old Seabee news letters by George Mojonier, and Richard Sanders. No special software is required. All files are in Adobe Acrobat format and I include a reader with the CD. Once the Acrobat Reader is installed, just put the CD in the computer and it starts automatically! Contact Steve at smestler@pbtcomm.net **I have them both, they're a great reference!**

The Seabee Experts

Simuflight

Ken Thompson runs the 6000 sq ft facility in Fallon NV and their engineering and operations are run by Scott Henderson out of Anchorage Alaska. They also offer a traveling A&P/IA Seabee expert supported by their shop that can handle anything that is wrong with a Seabee. Simuflight's Fallon facility is a complete Seabee maintenance station. Please contact Scott Henderson

(scott@simuflight.net) 907-339-8085 x6101. You can also visit their website at <http://www.simuflight.net> for more information. In addition to Simuflight's many STC'd and non STC'd kits they are also working with the FAA to begin producing replacement parts for the Seabee.

Scott is looking for interested parties concerning replacement floats. They are working on a new design as parts are getting hard to find. He writes... The Floats will be STC'd

- * I am guessing carbon fiber and should be very light.
 - * They will be one piece so no seam, they will look better. The actual shape will not change since changes like this would require flight and water testing. I am just going to get rid of the seam.
 - * Less drag? maybe but nothing to right home about.
 - * No corrosion - we are going to make sure these have no parts that will corrode.
 - * Off the shelf replacement - We spend a lot of time straightening bent floats because there is no more replacements. The one we are doing now have \$600+ in labor and heat treating in it.
 - * Price - Who knows, FAA is going to beat me up a little but my hope is to bring each float in under \$1000 but I am guessing a starting point would be \$995 per float. This price would assume fairly good volume. The engineering on this is going to take some time to get through the FAA. I can't just make a look alike float out of carbon fiber I have to design the layout and write a specification for the resin and manufacture and then get it all approved. I am guessing I will have about 160 hours of engineering by the time I am done with the FAA. Then we still have to make them as well.
- Bottom line is if there is no interest I am not going to jump into this project. Jereme still has a few float halves available so we can work with those for the time being. The problem with his floats is, they are not heat treated and when we heat treat them they like to warp on us.

New From Simuflight*

We have not officially announced it but McHugh Aviation completed an STC for an electric trim replacement for the Republic Seabee (RC-3) this last year. Due to the extensive FAA rules on PMA it is still not ready for shipping but we are taking pre-orders at this time and I am hopeful shipping will occur sometime this fall.

This STC was the final project my father (Joe McHugh) was working on for the Seabee and took an additional three years after I took things over to complete but is a nice kit. The FAA put us through the ringer on this one (primary flight system) but in the end they were very happy with the results. This system completely replaces the original trim system and replaces it with three servo motors (two for the elevator, one for the rudder), the entire installation weighs less than a pound. This system also adds a rudder trim. The installation removes ALL the original hardware. Actuation of the trim is via a typical hat switch on the yoke and/or alternate panel switches.

The system was extensively flight tested (both our internal DER and the FAA flight test staff) with special attention to management of flight controls and the system in trim runaway situations. The result is a clean and simple system that addresses one of the high maintenance systems on the aircraft and of course adds that long desired rudder trim. For more information please check our website at:

<http://www.simuflight.net/content/view/30/29/> or e-mail me at scott@simuflight.net.
