DISTRIBUTORS BULLETIN No. 8

SERVICE NEWS DISTRIBUTION

Plans of the Service Department call for two types of Service News.

General Issue

This is a type-set, illustrated and printed issue for distribution to all Distributors, Dealers, and eventually to owners. It covers information of a general nature which will be applicable to most airplanes.

Distributors' Issue

This is a mimeographed, rush issue which covers topics of immediate interest to Distributors or which affects a limited number of airplanes. Copies of this issue will be sent to Distributors only, and will cover technical items or policy.

\* \* \* \*

Hereafter, distribution of both types of Service News will be made to the Distributor directly. Republic will, therefore, forward sufficient copies to permit you to disseminate the information to your network of Dealers and, when applicable, the Seabee owners in your area.

In this way you, as Distributor, can exercise full control over your Dealers and customers, even to dissemination of service information, none of which will go directly from the factory to the people under your control.
