DISTRIBUTORS BULLETIN No.16

---

ENGINE, PROPELLER AND RADIO SPARES

Aircooled Motors, Inc., Hartzell Industries, Inc., and the Hallicrafter Co., manufacturers of engine, propeller and radio respectively, are organized to distribute their own spare parts. You, as a Seabee Distributor, are eligible for consideration as a distributor for each of these companies. If you have not already taken action, it is suggested that you contact Aircooled, Hartzell and Hallicrafters promptly and request establishment as their distributor so that your Seabee Dealers and their customers may be assured of spare parts.

At Republic we are maintaining a token quantity of engine, propeller and radio spares, for emergency purposes only. Any stock orders for these parts which you might order through us, will be relayed to the applicable company for direct shipment and billing. Therefore, it is to your advantage to become a distributor for Aircooled, Hartzell and Hallicrafters, to insure adequate stock and good service to your customers.
