Distributor's No. 40

DEALERS BASIC MAINTENANCE STOCK

In compliance with your requests, we have selected, on the basis of consolidated consumption figures, a Dealer's basic maintenance stock of Seabee Spare Parts. We have selected only expendable items on which the replacement frequency is high. In round numbers, the list price value of this stock is \$786.00 or a cost to the Dealer at the recommended Dealer Discount figure of \$622.00; the cost to you as a Distributor is approximately \$513.00.

This means a profit to the dealer of \$164.00 and a profit to you of \$109.00. As suggested at the recent Seabee Distributors Convention, you have but to sell this stock to five of your Dealers to realize a profit of better than \$500.00 which will permit you to place the same stock of spares on your own shelves at no cash outlay.

It is to your advantage to place this stock of spares on the shelves of each of your Dealers, for in so doing, you insure a better distribution of material in the territory with a smaller investment of your own capital, and increases the efficiency of service to your customers.

A supply of Dealer's Basic Maintenance Stock lists is attached; additional copies may be secured on request.
