

Jim Poel's Seabee Emergency Repair Kit List

The list below was given to me by Capt. (Ret) Jim Poel. It contains all the little things that he carries with him in his Seabee every where he goes. He has a four-compartment zipper bag, bought at Walmart, he uses and the contents are arranged below in the compartment they are in. Very organized! I can't think of anything that is missing except maybe a spare engine!

The tool bag is a heavy-duty fabric type available at department stores (Walmart), Army/Navy, or you could order one from the Seabee website (If you haven't already). The total weight is an incredible 12 pounds! Jim says, "The mini blow torch (comp. #4) can be used to start a fire or solder stuff. The tire pump (comp #2) is made out of plastic and weighs nothing. The elevator lock (comp #2) is a bolt, two washers and a nut that locks one half of the elevator trim in case it starts to flutter. This will get you home"
