Panel mounted Intercom system
KT 76 with Encoder
King KDM 150 VFR GPS
Shadin Fuel computer
EI engine Monitor EGT/CHT
Life vests, anchor, emergency equipment included

Aircraft pictured on home page of the Association

This aircraft was stored from 1963 to 1993 in Southern California after being moved from Portland Oregon after wind storm damage. Full Airworthness and returned to Service in 1997.

Sold and flown to Florida in 2000 where, she went thru many upgrades including the engine overhaul. Aircraft was moved to the inland Massachusetts. Flown very little, purchase and moved to Arizona for restoration. Restoration completed, aircraft normalized per operations with 2 new (Overhauled) cylinders installed # 3 and # 6, purchased from Southern Aero, LLC. The aircraft is currently flying and can come with a fresh annual.

I have committed to purchase another RC3 with the Lycoming upgrade, while I would love to keep this one as well, have 2 is simply not practicle. So, If interested, give me a call.
