### **LIFE PRESERVER SEAT CUSHIONS**

You are aware of the fact that the back cushions of both the front and rear seats of the Seabee are life preservers and are easily removable if the occasion arises when their use is found necessary.

It has come to our attention, however, that although it has been general knowledge to the pilot, passengers have not always been advised of this very important fact.

It is therefore recommended that a placard be conspicuously placed in the cockpit drawing attention to the dual use of the cushions or that each be marked "LIFE PRESERVER" at a clearly visible location.

W. H. Ehmman  
Service Manager
